- [PMC Laboratory Remains open for Testing as Usual During Summer](#)
- [Oil Analysis Training - Planning Fall Sessions](#)

Summer Vacations...

... offer a great opportunity to catch your breath, switch from on to off and do what you like best such as Golf, fishing, camping, boating, gardening, traveling, on the beach, or just enjoying poolside family BBQ in the backyard.

Your monthly newsletter also takes a break for this period and will come back in August with the technical content that you are used to.

Meanwhile, enjoy your summer vacations!

PMC Laboratory Remains Open for Business as Usual During Summer

Our Business hours do not change for the summer and our staff will be on duty as usual and at your disposal to provide you our premium oil analysis service.

Oil Analysis Training – Planning Fall Sessions

Many industries select summertime as the period of the year to perform heavy maintenance on their equipment. Vacation time is very often shutdown time as well.

In this context some may find that summertime may also be a good time to plan the training of their equipment maintenance personnel for oil analysis.

On our side, we have not planned any training sessions this summer. We will resume in September and will keep you informed of the schedule.

Meanwhile however, we invite you to let us know if you have any specific training requirements and we will be pleased to cooperate with you in scheduling the topics and the sessions.
