To all our customers and partners, we wish Happy Holidays and a very Happy, Healthy and Prosperous New Year!

Reminder:

Professional Training Session

MLA & MLT Level 1

March 6 – 9, 2017

This 4-day training session covers **ICML** certification preparation of the **Machine Lubricant Analyst** and **Machinery Lubrication Technician** body of knowledge in accordance to ISO 18436-4.

ICML (International Council for Machinery Lubrication) is an independent, not-for-profit organization that facilitates the development of machine lubrication as a technical field of endeavor. ICML supports the development of international lubrication-related standards and guides at ASTM, ISO and other organizations. ICML also offers skill certification testing in the fields of machine condition monitoring, lubrication and oil analysis.

Machine Lubricant Analyst (MLA) - These individuals must demonstrate skills in used lubricant analysis for machine condition monitoring. Level I certification is oriented toward the basics of lubrication and sampling.

Machinery Lubrication Technician (MLT) - These individuals must demonstrate skills in the day-to-day activities associated with proper lubrication of machinery. Level I is oriented toward lubrication basics and the proper application and storage of lubricant.

Matt Spurlock, CMRP, CLS, CRL
VP of Operations and Technology

Matt has 20+ years of hands-on experience with machine lubrication and oil analysis, including eight years in the US Marine Corps. He has designed and developed many machine lubrication and oil analysis programs, and provides his expertise to industrial companies worldwide.

This class is provided by **Tribologik Corporation**, a leading North American oil, coolant and fuel analysis laboratory with operations in the United States and Canada, in cooperation with **Advanced Machine Reliability Resources Inc. AMRRI** assists manufacturers interested in improving machine performance and productivity.

Cost: \$1 295.00

Location:

Tribologik Corporation (Chicago area) Nicholas Reich MLA II | VP Sales &Marketing
1212 172nd St.
Hammond, IN 46321

Certification Exam: \$275.00 (Direct to ICML)

Information:

nreich@tribologik.com

(312) 800-2888 Ext. 40

Course Topics*

Precision Lubrication and Machine Management Strategies
Lubricant Construction
Lubricant Selection Practices
Lubrication Application – Oil
Lubricant Application – Grease
Lubricant Storage and Handling

Applied Tribology: The Science of Precision Lubrication
Performance Properties
Introduction to Oil Analysis
Lubricant Condition and Contamination Control
Condition Monitoring

This class will help you understand the positive impact that high quality lubrication practices can have on your machine's health and your plant's productivity.

Participants will learn how to transform a reactive maintenance practice to a professional, condition monitoring and predictive maintenance process:

Detect problems before they occur
Save on downtime
Increase productivity
Increase profitability

Prevent failures
Save on equipment and spare parts
Increase performance
Improve reliability

*CERTIFICATION EXAM:

An optional certification exam is offered on Friday, March 10. The exam and certification is offered through the International Council for Machinery Lubrication (ICML). To take the certification exam you must register on the ICML website <http://lubecouncil.org> and pay (\$275) at least two weeks before the class.
